Education

Bachelor of Computer Science Faculty of Computers and Artificial Intelligence – Cairo University Relevant Coursework: Web Technology, Database, Software Engineering, Data Structures, Algorithms, OOP, ML, OS	Oct '22 - Present
Amal International High School – IGCSE Grade: 100%	Oct '21 – Jul '22

Technical Skills

Programming: C++, C, Java, Python
Web Development: HTML5, CSS, JS, React.js, Django
Mobile Development: Flutter, Dart, Kotlin
Database: MS SQL Server
Additional Technologies: Firebase, JSON, Git, Version Control, Github, Colab
Design: Figma, Canva, Adobe XD, Adobe Illustrator, ProCreate

Relevant Experience

DEPI – Mobile App Development - Acquired foundational knowledge in Kotlin and Android Studio. - Learned XML for designing UI components. - Gained experience with navigation, linear layout, and constraint layout. - Learned Flutter for cross-platform app development. - Studied Jetpack Compose for modern UI development in Android.	Jun '24 – Present
ITI – Mobile App Development Using Flutter - Developed proficiency in Flutter and Dart, mastering OOP and OOD principles. - Utilized Firebase for backend development and demonstrated the ability to fetch data from APIs. - Created dynamic and interactive user interfaces using stateless and stateful widgets. - Complemented these skills with a solid foundation in front-end technologies, including HTML, CSS, and JavaScript.	Jul '23 – Aug '23

Workshops and Training

Coach Academy – Problem Solving Training	Aug '24 – Present
GDSC - UI/UX Workshop	May '24 – Jun '24

Projects

Flashcards App - StudyFlash - Developed an interactive flashcards application using Kotlin, with Jetpack Compose for the user interface, aimed at enhancing study efficiency and retention for learners. - Designed the user interface using Figma to create an intuitive and visually appealing experience. - Utilized Firebase as the database for seamless storage and retrieval of flashcard data. - Implemented features such as cards grouped into categories for organized studying and timed quizzes to test knowledge under pressure. - Integrated gamified hints using points to encourage user engagement and make learning more enjoyable. - Included progress tracking to allow users to monitor their improvement over time. GitHub Link

Online Library Website

- Developed a comprehensive online library website as part of a web technology course, handling both frontend and backend development.
- Implemented user authentication, allowing users to sign in as either an admin or a student.
- First version used local storage for data management; later integrated Django for the backend, utilizing its database to store user and book information.
- Enabled full CRUD (Create, Read, Update, Delete) operations for managing books information.
- Features included the ability to borrow books, and filter books based on multiple categories.

[GitHub Link](#)

University Library Management System

- Developed a university library management system using a GUI Windows Form in C#.
- Utilized entity relationship modeling to design and implement the database schema.
- Implemented full CRUD (Create, Read, Update, Delete) operations for managing library resources and user information.
- Created an intuitive and user-friendly interface to enhance user experience.

[GitHub Link](#)

Personal Portfolio Website

- Currently developing a personal portfolio website using React.js.
- Integrated Swiper.js to create a dynamic and interactive carousel for showcasing projects and skills.
- Focused on building a responsive and visually appealing design to highlight personal achievements and technical expertise.

[GitHub Link](#)

Image Processing

- Developed an image processing application using C++.
- Utilized a library to process bitmap images and convert them into 2D arrays.
- Implemented various filters for both black and white and colored images, including skew, rotate, blur, scale, and crop.

[GitHub Link](#)

Board Games

- Designed and implemented classic board games, including Connect Four and a Five by Five Tic-Tac-Toe, utilizing C++.
- Applied advanced Object-Oriented Programming (OOP) principles to enhance code modularity, scalability, and maintainability.
- Developed intuitive game mechanics, user interfaces, and win/lose conditions for an engaging player experience.
- Demonstrated proficiency in C++ programming, emphasizing strong problem-solving skills and a deep understanding of OOP concepts.

[GitHub Link](#)

Quiz App

- Developed an engaging Quiz App using Flutter, a cross-platform mobile application framework.
- Implemented the app to read questions from a JSON format, enhancing flexibility and easy updates.
- Incorporated stateful widgets for an interactive user interface, allowing real-time tracking of the user's score.
- Ensured seamless user experience through effective use of Flutter's stateful features.
- Demonstrated proficiency in mobile app development, problem-solving, and data management.
- Practiced Flutter navigation to ensure smooth transitions between different screens within the app.

Certifications

Egypt FWD - Web Development Challenger Track

Aug '22

- Gained comprehensive knowledge in web development, including responsive web design techniques.
- Developed proficiency in HTML for structuring web content.
- Acquired skills in WordPress for creating and managing websites.

Egypt FWD - Data Analysis Challenger Track

Aug '22

- Acquired fundamental knowledge in statistics and probability.
- Learned to apply statistical methods and probability concepts using Excel for data analysis.
- Gained practical experience in analyzing and interpreting data to inform decision-making.

Programming for Everybody (Getting Started With Python)

Jun '21

Extracurricular Activities

Egyptian Collegiate Programming Contest – ECPC

Aug '23, Jul '24

Achievements

Flashcards App – Ranked among the top 10 projects in Mobile App Development • DEPI Program

Oct '24
